WDSL radio
P.O. BOX 404/ MOCKSVILLE, N.C. 27028
1520 KHZ - 5000 WATTS

June 1, 1989

Mr. Bill Burrows
709 Division Street
Gloucester City, New Jersey 08030

Dear Bill:

I am happy to verify your DX report on our station. We are a daytime station operating with a non-directional pattern. Our maximum daytime power is 5000 watts on 1520 kHz. However, we operate with 1 kw during "critical hours"--that is, two hours after sign-on and two hours before sign-off. So, if you heard us at 5 PM in January, you were picking us up on 1000 watts!

Our broadcast hours are local sunrise to local sunset. In June, our hours are 6 AM EDT to 8:45 PM. Our antenna is 123 feet in height. We primarily serve Davie County. (See enclosed coverage map.) Our studio is located at 1011 Hardison Street in Mocksville. Our transmitter is located on State Road 1800 (Eaton Road), which is about two miles from the studio. We are affiliated with the North Carolina News Network (NCNN), a full-service regional network. We receive this network by satellite.

Our format is primarily contemporary country music with three hours of gospel music thrown in!

We have been heard in Alabama, Chicago and Connecticut--among other places.

Thank you for your interest in WDSL. If you ever get down this way, please drop in for a visit.

Sincerely yours,

George

George Frye, Jr.
